Cancel Claims 1 - 38

39. (new) A dental device comprising: female friction fitting means with a pickup means attached to a scaler where said female friction fitting means is connected to a fitting means connection means which is connected to an amplifier which is connected to audio production device where said has a condenser microphone with a receptacle to pick up vibrations from said scaler.
40. (new) A device as in claim 39 in which said audio production device is headphones.
41. (new) A device as in claim 39 in which said amplifier has a volume control.
42. (new) A device as in claim 39 in which said audio production device has a volume control.
43. (new) A device as in claim 39 in which said audio production device connects to said amplifier through a plug being inserted into a plug jack.
44. (new) A device as in claim 39 in which said amplifier has a clip attached to one side.
45. (new) A device as in claim 39 in which said amplifier has a power source connected to it.
46. (new) A device as in claim 45 in which a plurality of scalers can be interchangeable.
47. (new) A device as in claim 39 in which said connection means between said pickup and said amplifier is wireless.
48. (new) A device as in claim 39 in which claim 45 in which said scaler is a long dental tool with a scaler tip on one end and a scale male fitting on the other end.

App. No. 10/707,967

49. (new) A method for root planning comprising using a device female friction fitting means with a pickup means attached to a scaler where said female friction fitting means is connected to a fitting means connection means which is connected to an amplifier which is connected to audio production device where said has a condenser microphone with a receptacle to pick up vibrations from said scaler, using said scaler on teeth and having listened to said audio production device.

50. (new) A method as in claim 49 further comprising having said audio production device is headphones.

51. (new) A method as in claim 49 further comprising having said amplifier has a volume control.

52. (new) A method as in claim 31 further comprising having said audio production device has a volume control.

53. (new) A method as in claim 49 further comprising having said audio production device connecting to said amplifier through a plug being inserted into a plug jack.

54. (new) A method as in claim 49 further comprising having said amplifier has a clip attached to one side.

55. (new) A method as in claim 49 further comprising having said amplifier has a power source connected to it.

56. (new) A method as in claim 49 further comprising having said scaler is a long dental tool with a scaler tip on one end and a scale male fitting on the other end.
